- Families and Communities Together (FaCT)

Injury Death Trends by Age Group OC Residents 0-19 yr, 1997-2007

Number of Deaths

CA4, AAP Committee on Injury and Poison Prevention (ongoing)

IVPP enhanced by funding from the Children and Families Commission of Orange County

By targeting the young children (0-5 years), the Injury and Violence Prevention Program implemented by the California Chapter 4, American Academy of Pediatrics has achieved a remarkable decrease in injury mortality when compared to the age groups not targeted. However, injury remains the leading cause of death and disability over the age of 1 year.
